

Aditi Singh

Senior Product Designer · Highspot

aditisingh.design@gmail.com · linkedin.com/in/aditising · aditisingh.ca

Senior product designer with 6 years of B2B SaaS experience, specializing in AI assistant and analytics products. At Highspot, I lead design for an AI agent that analyzes sales activity and surfaces recommendations. I partner with product and engineering to translate technical capability into trustworthy product experiences.

EXPERIENCE

Senior Product Designer · Highspot

Sept 2022 – Present | Canada (Remote)

- Lead end-to-end design for a specialized agent that analyzes sales activity and surfaces recommendations to GTM teams. Design work focuses on translating AI outputs into clear interactions, including communicating reasoning, handling output variability, and building user trust.
- Led end-to-end design for the analytics platform, owning information architecture, interaction models, and visual systems across 8+ cross-functional feature crews. Established shared patterns and a data visualization library to raise consistency across the product.
- Shipped Initiatives from 0 to 1, a tool for sales leaders to track seller activity against strategic goals. Demoed at Highspot's largest annual customer event; attributed to 30% of company pipeline.
- Redesigned the core search experience to reduce time-to-content for sellers, validated through customer interviews and usability testing.

Product Designer · Guidewire Software

Jan 2022 – Aug 2022 | Canada (Remote)

- Led end-to-end design for single sign-on across Guidewire's product suite, partnering with product and engineering to unify the sign-in experience across all customer-facing applications.

Product Designer · Mitel

Sept 2019 – Dec 2021 | Ottawa, Canada

- Led end-to-end design for video conferencing across web, mobile, and meeting room surfaces, from discovery through delivery, and engaged directly with customers to validate concepts through research sessions.

Research Assistant · IIT Guwahati

Sept 2015 – Apr 2017 | India

- Designed and conducted usability testing for zooming interactions on flexible display devices, contributing to 4 peer-reviewed HCI publications.

Architect · Anagram Architects

May 2012 – Jun 2015 | New Delhi, India

- Led concept design, technical drawing, and on-site coordination for 10+ projects, with work recognized in Architizer, Archdaily, and Designboom.
-

EDUCATION

MASc, Human-Computer Interaction

Carleton University, Canada · 2017 – 2019

Bachelor of Architecture

Birla Institute of Technology, India · 2007 – 2011

SKILLS & TOOLS

Design & Research: End-to-end product design, User research, Customer interviews, Information architecture, Interaction design, Visual design, Prototyping, Usability testing, Accessibility, Design systems, Qualitative & quantitative analysis

AI & Prototyping: Cursor, Claude, React (prototyping), Figma, Figma Make, HTML/CSS, Conversational UX patterns, Agentic design

NOTABLES

Published 6 research papers in peer-reviewed HCI conferences. [Google Scholar profile](#)

3rd place, 3-Minute Thesis competition, Carleton University. [Pitch video](#)

Architecture work recognized in [Architizer](#), [Archdaily](#), and [Designboom](#).
